c.1850-1872

1142-1100 Riverside Ave. (West side)

Baltimore, Md.

Private access

The west side of the 1100 block of Riverside Ave. is improved with a variety of house types, including one very unusual pair of one and a half story, two bay wide brick houses with steep gable roofs at 1124-1126 Riverside Ave., which seem to date from the early 1850's. At 1132-1142 Riverside there is a group of three story, two bay wide brick houses with shed roofs and simple modillion cornices, built by John T. Grindall in the 1860's. Adjoining to the north is a pair of two story, two bay wide brick houses with shed roofs and bracketed cornices, probably built about the same time. To the north of the pair of one and a half story houses described above, there is a pair of three story, two bay wide brick houses with shed roofs and no extant roof cornices, at 1120-1122 Riverside Ave., built in the late 1860's. 1118 Riverside Ave. is a three story, two bay wide gable-roofed house. 1104-1116 Riverside Ave. is a group of two story plus attic, two bay wide brick houses, all of which sit on high basements and were built in the early 1850's. Finally, at 1100-1102 Riverside Ave. there is a pair of two story, two bay wide brick houses with shed roofs and no extant roof cornices, built about 1872. 8

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This pair of two story brick houses with shed roofs were built on this site in the 1870's and formed part of the later development of this lower end of Riverside Ave.

The houses are two stories in height, 12 1/2' wide, and occupy lots 82' deep. The houses are three rooms deep and there are no rear additions. The houses are constructed of running bond. The shed roof is capped by a stamped sheet metal cornice consisting of a deeply projecting crown molding decorated with embossed medallions, set above a plain frieze area with a lower molding strip. Five grooved brackets connect the cornice to a lower molding strip. The brick frieze area thus formed has four punched metal ventilating panels. The two end brackets terminate at their upper edges in "anthemions," with applied medallions. 1128 Riverside has a single covered chimney located along the north side of the front section of the roof; 1130 has a single covered chimney located along the south side of the front section of the roof. 1130 also has a rear end chimney located at the west end of the house. There is a one story high, one bay deep frame addition at 1130 Riverside.

The door and window openings all have segmentally arched brick lintels with scroll-sawed tympanums and wood sills. All of the window openings are filled with 1/1 double hung sash. Both houses have Mission-style oak doors set beneath single light transoms. The transom of 1130 Riverside, however, is covered with siding. Both houses sit on fairly low basements, the entrances being reached by three stone steps each. Each house has a rectangular basement opening located beneath the first floor window.
